

Zetwerk offers BIS-compliant manufacturing for household and commercial electrical appliances from its Noida facility

As India expands mandatory BIS certification across product categories, Zetwerk's end-to-end manufacturing capabilities help brands meet evolving quality, safety, and compliance standards while accelerating local production.

Bengaluru, October 16: Zetwerk a global manufacturing company, offers BIS-compliant manufacturing for electrical appliances used in homes and commercial setups, supporting India's transition toward a safer, more self-reliant, and globally competitive manufacturing ecosystem.

As the Government of India expands the scope of mandatory certification under the Bureau of Indian Standards (BIS), Zetwerk has built robust, end-to-end capabilities that help brands meet evolving quality and compliance requirements across consumer and industrial categories.

From its advanced facilities in Noida, Uttar Pradesh, Zetwerk enables the local production of devices that were earlier imported, ensuring these products are now designed, developed, and manufactured in India, in line with stringent domestic and international benchmarks for safety, performance, and durability. Its BIS-ready manufacturing portfolio today covers a diverse range of products, from everyday consumer appliances such as vacuum cleaners, trimmers, and electric toothbrushes to complex industrial assemblies used in renewable energy and power infrastructure.

Rahul Sharma, Managing Director (Precision (Electronics) Zetwerk, added: "Quality and compliance are central to scalable manufacturing. Over the past year, we've developed comprehensive testing frameworks and standardised production processes to help brands align seamlessly with BIS norms. This shift is accelerating India's move toward trusted, world-class manufacturing."

With the government's latest notification extending BIS certification to a wider list of electrical appliances, industry experts expect stronger momentum in domestic manufacturing. Zetwerk's proven expertise in compliant, high-precision production positions it as a trusted partner for global and Indian brands seeking to combine regulatory readiness with scale, speed, and quality.

As India advances its manufacturing standards, Zetwerk continues to help partners navigate this evolution with engineering excellence, process integrity, and a shared commitment to nation-building through manufacturing.

About Zetwerk:

[Zetwerk](#) is a technology led global manufacturing company that helps organizations catalyze ideas into products. With 20+ owned facilities and a network of 5400+ suppliers across 25 countries, Zetwerk manufactures products for sectors including Energy, Electronics, Capital Goods and Defence & Aerospace. Zetwerk's proprietary manufacturing operating system, Zetwerk OS, orchestrates complex supply chains to provide absolute transparency and faster time-to-market. Headquartered in Bengaluru, Zetwerk serves over 1,100 customers, including 98 of India's Fortune 500 companies.
